

CAPELLA™
TELLURIDE

Hotel Condominiums

The flooring at the entry of each unit is 6" wide distressed wood flooring. The wall to wall carpet throughout the living and sleeping area is a superior nylon, inherently soil resistant. The pattern is a subtle tone on tone texture with a loop/cut pile construction. The carpet pad is a recycled content, dense foam pad, providing great comfort and sound absorption. The walls throughout the unit have a detailed wood base molding as well as a wood crown molding. The walls are finished with wall covering in a creamy, luminescent color. The closet features a custom fit-out for additional storage and shelving.

The main material in the well-appointed bathroom is a warm, latte colored travertine tile. The floor, detailed stone base, shower stall and bench are all finished in various sizes of travertine tile and molding. A basket weave design in travertine and black marble accents the floor as well as the shower walls. The soaking tub is luxuriously deep and sits in a decorative niche with a Waterworks European style personal shower. A decorative glass panel door separates the water closet from the bath area. The recessed lighting is complemented by a decorative pendant light fixture at the vanity mirror. The double sink vanity base is a furniture grade wood piece with storage below and a slab stone top. A glass shelving storage/display niche trimmed in wood is provided adjacent to every vanity. A total of three robe and towel hooks are provided in strategic locations for convenience. The walls are finished with a coordinating, luminescent vinyl wall covering with a subtle striated pattern and wood crown molding.

The hotel condominiums feature a mini-bar. This mini bar is concealed in a furniture piece which in many locations is recessed and features glass shelving lit from above by a low voltage recessed light.

The furnishings are quality, handcrafted custom pieces with the focus on classic styling, comfort and function. Warm woods with a lightly distressed finish, stone and leather wall tile are combined with classic European styling to create a unique, understated mountain aesthetic. Under-bed storage is provided in addition to an upholstered storage bench (in most units). Fine fabrics have been selected for their 'hand' comfort and durability – leathers are combined with wools, chenilles and woven fabrics with a hint of a metallic thread in a nature-based color palette. All fabrics are code compliant and provide spill and stain resistance. Window coverings provide a layer of sheer privacy and a blackout layer, coordinating and complementing the overall design.
